SUMMARY

Backend & Full-Stack Engineer building production-ready web applications with Go, Node.js, React, and Next.js. Deployed on Cloudflare, Render, and Vercel.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Go, JavaScript, TypeScript.
- **Backend Architecture:** Go, Node.js, Express.js, REST APIs, WebSockets, OAuth 2.0, JWT, GraphQL.
- **Frontend Architecture:** React.js, Next.js, TanStack Query.
- **Databases and Systems:** PostgreSQL, MySQL, MongoDB, Linux, Relational Database Design.
- **Core Competencies:** Data Structures and Algorithms, OOP, Agile, Git, GitHub, Postman.

EXPERIENCE

Software Engineer

Feb 2026 – Present

ActionBoard.AI (Deep Data Labs)

- Engineered multi-tenant systems with Next.js, TypeScript, and GraphQL, serving 5,000+ enterprise users; improved throughput by 20% and reduced page load times by 20%.
- Built backend modules for task management and messaging, increasing daily active usage by 15% and cutting operational overhead by 30% via ML integration.
- Shipped features ahead of schedule in an Agile team of 6; established CI pipelines with Postman, reducing debugging time by 25%.

Software Engineer Intern

Aug 2025 – Jan 2026

Luciety

- Architected auth services using Go, OAuth 2.0, JWT, and bcrypt, securing 5,000+ sessions; integrated payment gateways, reducing transaction failures by 20%.
- Designed normalized PostgreSQL schemas and REST APIs, cutting query response times by 25%.

PROJECTS

Personal Portfolio Platform | Next.js, TypeScript, Go, MongoDB, Cloudflare

[Live] [GitHub]

- Developed a full-stack portfolio platform with a centralized admin dashboard for managing blogs, projects, messages, and dynamic content.
- Deployed the application to production using Cloudflare Workers, custom domain, DNS, HTTPS/SSL, and Cloudflare–Render integration for frontend–backend connectivity.
- Implemented CI/CD automation and configured production infrastructure, including CORS, domain routing, and deployment troubleshooting.

Smart Parking System | Go, React.js, PostgreSQL

[GitHub]

- Delivered a web application for automated slot booking, serving 500+ active users and reducing manual overhead by 40%.
- Configured OAuth 2.0 authentication and connected email notification pipelines to automate user verification protocols.

Blood Donation Network | Node.js, MongoDB

[GitHub]

- Established a centralized dashboard to process medical requests and accelerate donor matching workflows by 40%.
- Deployed NoSQL databases to track user information and process over 1,000 operational records.

EDUCATION

University of Information Technology and Sciences

2022 – 2025

B.Sc. in Computer Science and Engineering (CSE)

ACHIEVEMENTS

- **Competitive Profiles & Scope:** Codeforces (Pupil), LeetCode, HackerRank, CodeChef; solved 2,000+ challenges across 180+ contests.
- **Inter-University Contests:** 57th Rank, AUST Code Clash (2025); 76th Rank, UIU CSE Fest IUPC (2025); 67th Rank, Uttara Univ. IUPC (2025); 16th Rank, UAP Junior Programming Contest (2024).
- **Intra-University Contests:** 3rd Rank, Skillathon Programming Contest, UITS (2025); 3rd Rank, CSE & IT Contest, UITS (2025); 2nd Rank, CSE Day Contest, UITS (2025).
- **Hackathons:** 2nd Rank, Hackify Fest (2025); 2nd Rank, National Hackathon.
